Department of Information Technology
Laboratory Continuous Assessment Sheet

First / Second Half of 2026

Course Name: Mobile Application Development Laboratory

Name of the Teacher: Mr. Anandkumar Pardeshi

Name of the Student: Parth Sandeep Chaudhari

Roll No: 5024112	**Semester: V**
Batch: B1	**Practical No:** 6
Date of Practical: 31 / 8 / 2026	**Date of Report Submission:** 2 / 9 / 2026

Title: To include icons, images, charts in flutter app

Course Outcome: Design & implement user interfaces using flutter widgets, layouts & animations, ensuring responsive & interactivity

Assessment

Sr. No.	Parameter for Assessment	Marks	Rubrics		
1.	Readiness to perform experiment (02Marks)	2	Above Average (02)	Average (01)	Below Average (00)
2.	Active participation in performance (02 Marks)	2	Above Average (02)	Average (01)	Below Average (00)
3.	Report writing (02 Marks)	1	Above Average (02)	Average (01)	Below Average (00)
4.	Interpretation of result (02 Marks)	2	Above Average (02)	Average (01)	Below Average (00)
5.	Regularity in Submission (02 Marks)	2	Timely (02)	Late (01) (≤ 2 Weeks from the date of Practical)	Very Late (00) (> 2 Weeks from the date of Practical)
Total Marks (10):		09			

Teacher's Signature: 01.09.26. **Date:**

EXPERIMENT 6

AIM: To create a Flutter application incorporating icons, images, and charts to improve the visual representation of information.

OBJECTIVE: To understand how icons, images, and charts can be integrated into a Flutter application for creating an informative and visually appealing interface.

COURSE OUTCOME: Design and implement user interfaces using Flutter widgets, layouts, and animations, ensuring responsiveness and interactivity

THEORY:

Flutter provides built-in support for icons and images, while charts can be created using charting packages. Icons represent actions or information, images improve visual presentation, and charts display data graphically for easier understanding. For DartPad, we can use the fl_chart package for the chart. Add fl_chart from the Packages section in DartPad.

Software Requirements:

- Flutter SDK
- Dart
- Android Studio / DartPad
- fl_chart package
- Web browser

CODE:

```
import 'package:flutter/material.dart';
import 'package:fl_chart/fl_chart.dart';

void main() => runApp(const MaterialApp(
  debugShowCheckedModeBanner: false,
  home: AnalyticsPage(),
));

class AnalyticsPage extends StatelessWidget {
  const AnalyticsPage({super.key});

  Widget build(BuildContext context) {
    return Scaffold(
      backgroundColor: const Color(0xFFF7F5FC),
      appBar: AppBar(
        title: const Text('Course Analytics',
          style: TextStyle(fontWeight: FontWeight.bold)),
        centerTitle: true,
        backgroundColor: const Color(0xFF6A1B9A),
        foregroundColor: Colors.white,
      ),
      body: SingleChildScrollView(
        padding: const EdgeInsets.all(20),
        child: Column(
          crossAxisAlignment: CrossAxisAlignment.start,
          children: [
            const Text('Welcome back, Nina 👋',
              style: TextStyle(fontSize: 24, fontWeight: FontWeight.bold)),
            const SizedBox(height: 5),
            Text("Here's your weekly summary",
              style: TextStyle(color: Colors.grey.shade600)),
            const SizedBox(height: 18),
            ClipRRect(
              borderRadius: BorderRadius.circular(18),
              child: Image.network(
                'https://picsum.photos/700/300',
                height: 160,
```

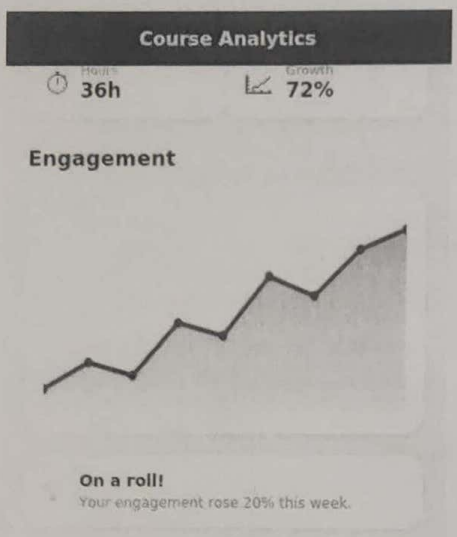

```
    width: double.infinity,
    fit: BoxFit.cover,
  ),
),
const SizedBox(height: 22),
const Text('Overview',
   style: TextStyle(fontSize: 18, fontWeight: FontWeight.bold)),
const SizedBox(height: 12),
Row(children: [
  Expanded(child: stat(Icons.track_changes, 'Modules', '12')),
  const SizedBox(width: 12),
  Expanded(child: stat(Icons.star, 'Rating', '4.8')),
]),
const SizedBox(height: 12),
Row(children: [
  Expanded(child: stat(Icons.timer, 'Hours', '36h')),
  const SizedBox(width: 12),
  Expanded(child: stat(Icons.trending_up, 'Growth', '72%')),
]),
const SizedBox(height: 22),
const Text('Engagement',
   style: TextStyle(fontSize: 18, fontWeight: FontWeight.bold)),
const SizedBox(height: 12),
Container(
 height: 220,
 padding: const EdgeInsets.all(15),
 decoration: BoxDecoration(
  color: Colors.white,
  borderRadius: BorderRadius.circular(18),
  boxShadow: const [BoxShadow(blurRadius: 10, color: Colors.black12)],
 ),
 child: LineChart(
  LineChartData(
   gridData: const FlGridData(show: false),
   titlesData: const FlTitlesData(show: false),
   borderData: FlBorderData(show: false),
   lineBarsData: [
    LineChartBarData(
     spots: const [
      FlSpot(0, 1),
      FlSpot(1, 2),
      FlSpot(2, 1.5),
      FlSpot(3, 4),
      FlSpot(4, 3.5),
      FlSpot(5, 6),
      FlSpot(6, 5.5),
      FlSpot(7, 7),
      FlSpot(8, 8),
     ],
     isCurved: false,
     color: const Color(0xFF6A1B9A),
     barWidth: 4,
     dotData: const FlDotData(show: true),
     belowBarData: BarAreaData(
      show: true,
      color: const Color(0x336A1B9A),
     ),
    ),
   ],
  ),
 ),
),
const SizedBox(height: 18),
const Card(
 child: ListTile(
```

```
        leading: Icon(Icons.lightbulb, color: Colors.orange, size: 30),
        title: Text('On a roll!'),
        subtitle: Text('Your engagement rose 20% this week.'),
       ),
      ),
     ],
    ),
   ),
  );
}

static Widget stat(IconData icon, String title, String value) {
 return Container(
  padding: const EdgeInsets.all(14),
  decoration: BoxDecoration(
   color: Colors.white,
   borderRadius: BorderRadius.circular(16),
   boxShadow: const [BoxShadow(blurRadius: 8, color: Colors.black12)],
  ),
  child: Row(
   children: [
    Icon(icon, size: 26, color: const Color(0xFF6A1B9A)),
    const SizedBox(width: 10),
    Column(
     crossAxisAlignment: CrossAxisAlignment.start,
     children: [
      Text(title, style: TextStyle(color: Colors.grey.shade600, fontSize: 11)),
      Text(value, style: const TextStyle(fontSize: 17, fontWeight: FontWeight.bold)),
     ],
    ),
   ],
  ),
 );
 }
}
```

OUTPUT:

CONCLUSION:

The Flutter application was successfully designed with icons, images, and a graphical chart, presenting a course analytics dashboard with overview stat cards and a weekly engagement line chart. The practical demonstrated how visual components such as icons, images, and charts can be integrated into Flutter applications to make information easier to understand and the interface more attractive.
